

NEGATIVE PRESSURE WOUND THERAPY

RX15

About Us

A.Z.M. is a developer and manufacturer company in healthcare business since 1998. Along with its qualified work force, A.Z.M. owns substantial experience on product development and on field clinical applications over years. With this background A.Z.M. is one of the global leaders in manufacturing of negative pressure wound therapy systems.

A.Z.M.'s main objective is to meet all needs of healthcare professionals while promoting patient comfort. For this purpose, A.Z.M. conform global quality assurance processes and certifications. All of A.Z.M. manufacturing processes, product quality controls and customer service are best quality assured under EC and ISO regulations.

Negative Pressure Wound Care Systems, we are keeping up with the latest technology and developments by doing constant Research & Development processes. With our brand FAVA we are offering both domestic and global markets to our high-tech and good quality Negative Pressure Wound Care Systems.

Our company is aware and carrying the responsibility of health sector and trying to carry out the best and fastest services with giving the quickest feedback in Sales and After-Sales processes which is our specialty.

A.Z.M. follows the below main principles throughout all of its operations and services:

- Adopt the best quality practices in order to meet global standards
- Focus on patient comfort and therapy effectiveness
- Keep continuous innovation and support further clinical studies
- Provide full service support on both sales and post sales processes
- Provide cost effective complete therapy solutions to healthcare institutions

Why Us?

-Because every decision that we make, is evaluated with regard to our customers' satisfactions and interests.

-Because focused on innovation and solution, we are interfere problems with haste in order to reach the accurate and fast result, maintaining the business flow without being compromised from quality and safety.

-Because in our business interactions, QUALITY, SAFETY and SATISFACTION are our top priorities.

WHAT IS THE FAVA NEGATIVE PRESSURE WOUND THERAPY?

The therapy depends on sterile closing of the acute or chronic wounds and application of homogeneously distributed negative pressure inside the wound bed.

Effectiveness of Negative Pressure Wound Therapy

It enables accelerated wound healing through controlled vacuum which removes infection and exudate from the wound bed. Accelerated wound healing provides cost effectiveness by early discharge of patients.

FAVA negative pressure wound care treatment;

* Exudate	Removes
* Organic and Inorganic Particles	
* Cell Migration and Granulation	Facilitates
* Local Micro Circulation	
* Capillary Formation	
* Keep Sub Atmospheric Environment Along the Wound Bed	
* Local Edema	Prevents
* Bacteria Colonization	
* Pain Relief Around the Wound Site	

Advantages

- Provides granulation
- Decreases local edema
- Prevents bacteria colonization
- Accelerates wound healing
- Provides cost effective therapy

Indications

- Pressure ulcer
- Diabetic ulcer
- Venous ulcer
- Subacute wounds
- Graft and flap sites
- Open Abdominal wounds
- Post-operation wounds
- Infected wounds

Contra-Indications

- Necrotic wounds
- Untreated osteomyelitis
- Open arteries and veins
- Non-examined fistulas

FAVA TOPICAL NEGATIVE PRESSURE WOUND THERAPY UNIT RX15

Ergonomic Advantage with New Colored Touch Screen Control Panel

Continuous and Intermittent Therapy Modes

Light Weight Design for Patient Mobility

Silent Operation

Rechargeable Lithium Ion Battery

Alarm Logging

Unit Operation Logging

Usage Profile Customization

Advanced Audible and Visual Alarm Options

Colored Touch Screen

Sensitive Micro Processor Control

Key Lock Option

User-Friendly Interface

Transfer on Data to PC

FAVA NEGATIVE PRESSURE FOAM CLOSURE SETS GENERAL FEATURES

FAVA NEGATIVE PRESSURE FOAM CLOSURE SETS

FAVA HOMECARE CLOSURE SET

FAVA homecare Closure Set involves the following:

- HC Large Closure Set
- * The Homecare closure set includes; foam, transparent film, port, skin cleanser, ruler, stainless steel scissors, gauze, gloves, underlying cloth and carriertray.
- * Supplemental accessories in the set provide fast, easy and effective applications.

FAVA Homecare Closure Set

Homecare closure set facilitates dressing change process.

FAVA SPIRAL FOAM CLOSURE SETS

FAVA Spiral Foam Closure Sets involve the following:

- Fava Spiral Foam Large Closure Set
- Fava Spiral Foam Medium Closure Set
- Fava Spiral Foam Small Closure Set

FAVA Spiral Foam Closure Set

There is a 2 layers of spiral foam in Fava spiral foam closure set for flexible and easy application.

FAVA BLACK FOAM CLOSURE SET

FAVA Black Foam Closure Sets involve the following:

- Fava Black Foam Large Closure Set
- Fava Black Foam Medium Closure Set
- Fava Black Foam Small Closure Set

FAVA Black Foam Closure Set

The foam thickness of FAVA Black Foam Closure Set is 3.3cm in order to meet requirements of deep wound applications.

FAVA SILVER FOAM CLOSURE SETS

FAVA Silver Foam Closure Sets involve the following:

- Fava Silver Foam Large Closure Set
- Fava Silver Foam Medium Closure Set
- Fava Silver Foam Small Closure Set

- * The silver agent has a wide spectrum of antimicrobial effect.
- * Enables standalone antimicrobial application without need of additional silver products.

FAVA Silver Foam Closure Set

As an antimicrobial agent silver ion are mixed with polyurethane raw material during foam production.

FAVA SILVER SPIRAL FOAM CLOSURE SET

Fava Silver Spiral Foam Closure Set involves the following:

- Fava Silver Spiral Foam Large Closure Set

Proven and Patented Silver Technology

- ISO 10993, Biocompatibility
- Agar Diffusion Test
- L929 MEM Elusion Test
- Intracutaneous Injection Test
- Kligman Maximization Test

FAVA Silver Spiral Foam Closure Set

There is a 2 layers of spiral foam in Fava silver spiral foam closure set.

FAVA WHITE THIN FOAM CLOSURE SET

FAVA White Thin Foam Closure Sets involve the following:

- Fava White Thin Foam Large Closure Set
- Fava White Thin Foam Medium Closure Set
- Fava White Thin Foam Small Closure Set

FAVA White Thin Foam Closure Set

FAVA White Thin Foam Closure set enables visual inspection of exudate movement and at the same time it reduces thickness of 1.6cm provides effective applications on partially thick and shallow wounds.

FAVA GREEN FOAM CLOSURE SET

FAVA Green Foam Closure Sets involve the following:

- Fava Green Foam Large Closure Set
- Fava Green Foam Medium Closure Set
- Fava Green Foam Small Closure Set

FAVA Green Foam Closure Set

FAVA Green Foam Closure Set enables visual inspection of exudate movement and its 3.3cm thickness provides effective applications even on deep wounds.

FAVA BLACK THIN FOAM CLOSURE SETS

FAVA Black Thin Foam Closure Sets involve the following:

- Fava Black Thin Foam Large Closure Set
- Fava Black Thin Foam Medium Closure Set
- Fava Black Thin Foam Small Closure Set

FAVA Black Thin Foam Closure Set

FAVA Black Thin Foam Closure set comes with 1.6cm thick foam for effective application on partially thick and shallow wounds.

FAVA GAUZE NEGATIVE PRESSURE CLOSURE SETS

FAVA GAUZE CLOSURE SETS

FAVA Gauze Closure Sets involve the following:

- Fava Gauze Large Closure Set
- Fava Gauze Medium Closure Set
- Fava Gauze Small Closure Set

- * Negative pressure is distributed homogeneously among the wound bed.
- * The gauze can fully adapt to the wound shape and completely fills the wound bed.
- * Easy application accelerates application process and supports patient comfort.
- * The antimicrobial effect of PHMB inside the gauze inhibits bacteria colonization and prevents bacteria penetration.
- * Barrier effect supports management of infection both in partial and full thickness wounds.

FAVA Gauze Closure Set

Gauze Closure Set includes PHMB as active antimicrobial agent to kill bacteria and bacteriostatic structure of the dressing prevents further infection risk.

FAVA FOAM AND GAUZE ABDOMINAL CLOSURE SETS

FAVA ABDOMINAL CLOSURE SETS

FAVA Abdominal Closure Sets involve the following:

- **Fava Gauze Abdominal Closure Set**

There are PHMB impregnated gauze pieces in abdominal gauze closure set.

- **Fava Foam Abdominal Closure Set**

There is a hydrophobic foam in abdominal foam closure set.

* In Fava gauze abdominal closure set and Fava abdominal closure set, the visceral protective layer provides no sticking barrier for inner organ protection.

FAVA CANISTER SET

Canister sets include a sodium polyacrylate solidifier that gels the collected exudate for safety usage.

- * Each canister has a specially designed hydrophobic bacteria and odor filter in order to capture aerosols and prevent contamination and bad smell.
- * Filter is designed to minimize the risk of contamination and to hold aerosols with a bacterial filter.

- * The FAVA Y-Connector inside the closure sets allows multiple wound therapy with single vacuum unit and canister.

- * The transparent films inside the closure sets securely adheres to wound surrounding without causing maceration on the healthy skin through the micro air transitions.
- * Special dome structure of the port is resistant to physical effect like twists and so allows steady negative pressure transition to the wound bed.
